🐙 github.com/Nelson-Lefebvre

Data & BI Analyst with a Master's in Computer Science and 2+ years building **clean, scalable datasets and data pipelines** from **diverse operational sources** across finance, IT and industrial-fleet systems. Strong **SQL** and **Power BI**, hands-on **ETL** and **ERP/SAP integration**, with a track record **closing data-quality gaps** across regions and functions and turning operational data into **dashboards and KPIs** for technical and non-technical stakeholders. Prior **Alstom** experience in the rail/mobility environment. Detail-oriented, comfortable in high-volume, fast-paced settings. Bilingual FR/EN.

EXPERIENCE

IS&T Operations and training

Alstom

Rochester, NY, USA

Sep. 2024 – Feb. 2026

- Built and standardized the **master dataset** for a **500+** **asset** IT fleet, eliminating duplicate and outdated records to **close data-quality gaps**, then developed **Power BI** dashboards and **KPIs** on the cleaned data for cost forecasting and fleet/infrastructure planning used by senior leadership.
- Acted as **data/documentation gatekeeper** for new-site deployments across the Americas, **validating** technical documentation (network topology, IP plans, rack layouts) before records were committed to production systems, closing data/documentation-quality gaps across regions and sites.
- Trained **~1,000 users/month** across North & South America, strengthening IT awareness and standardizing IT processes across the organization, reducing user errors.

Data Administrator — Risk & BI

Groupe Cr dit Agricole

Vannes, France

May – Aug. 2024

- Maintained **data integrity** across the regional bank's risk and **accounting** systems, aligning shared data elements and resolving discrepancies to preserve operational continuity.
- Performed **root cause analysis** on data and reporting incidents, coordinating corrective **action plans** with business units and IT stakeholders.
- Designed **credit-risk KPIs** for the lending portfolio in **SQL, Excel and MicroStrategy**; insights directly informed recovery-team strategy.

Data Engineer / Analyst

Carrefour Administratif

Mondeville, France

Feb. – Jul. 2023

- Built and deployed **ETL pipelines on GCP (BigQuery)** with Python to automate ingestion and transformation of **accounting data** from diverse sources, improving data quality and cutting manual processing.
- Led an end-to-end **EGALIM regulatory-compliance** reporting pipeline managing overdue-billing workflows, and built **Looker Studio** dashboards to monitor adherence.

SKILLS

Master Data Quality	& Data integrity, data validation, root cause analysis, data governance, controls monitoring, ERP/SAP integration , data modeling
Microsoft & BI	MS Excel (advanced), Power BI (advanced), MicroStrategy, Looker Studio, KPI & dashboard design
Languages & DB	SQL (advanced), Python, R, Bash, SQL Server, BigQuery, query optimization
Cloud & Tooling	GCP, AWS, Docker, Git/GitHub, Agile/Scrum
ML / AI	scikit-learn, TensorFlow, predictive & operational modeling , statistical modeling, data mining

EDUCATION

M.Sc. Computer Science — Decision-Making, Optimization & AI/Data

Universit  de Caen Normandie, France

2021 – 2023

Exchange Year — M.Sc. Artificial Intelligence

University of Nebraska at Omaha, USA

2022

B.Sc. Computer Science

Universit  de Caen Normandie, France

2018 – 2021

LANGUAGES & SOFT SKILLS

French (Native) · **English** (Fluent) · **Spanish** (Intermediate) Attention to detail, cross-functional collaboration, stakeholder communication, takes initiative, thrives in high-volume / fast-paced environments

✓ **Work Authorization:** Canadian Permanent Residency currently being processed — Eligible to work anywhere in Canada (Except Quebec). No restrictions, no sponsorship needed.
